## **Standard 6**

### **Learner Centered Information Science & Librarianship**

Principle 1: The librarian works collaboratively with other information professionals in support of the library program, student achievement, and the profession, and understands the role of all types of libraries in an integrated learning environment.

Principle 2: The librarian creates a school library program that is recognized as the central element in the intellectual life of the school as evidenced by use of statistical measures to evaluate and improve the program.

Principle 3: The librarian applies and implements the principles and concepts of collection development: evaluation, selection, acquisition, and organization of information, and employs standard bibliographic and retrieval techniques.

Principle 4: The librarian evaluates and selects existing and emergent technologies to support the library program in coordination with the Texas Education Agency's Long-Range Plan for Technology and the campus STaaR Chart.

Principle 5: The librarian communicates effectively with students and staff to determine information needs and applies knowledge of literature to guide development of independent readers.

Principle 6: The librarian demonstrates ethical behavior in all professional contexts and promotes the principles of intellectual freedom, information access, privacy, and proprietary rights.

Principle 7: The librarian engages in continuous self-evaluation and self-directed learning for professional growth by participating and contributing to professional associations and publications.
